

Name: \_\_\_\_\_  
Date: \_\_\_\_\_

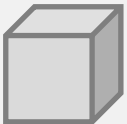

Strategy: 2 Dice throw: 'Break a Cube'  
Worksheet: Subtraction

Remember to develop the **action before abstraction**. (Korbosky 2014).

**The steps:**

1. Start with a MAB cube and throw 2 ten sided dice.
2. Make the largest 2 digit number you can from the dice.
3. Draw the number of MABs to match your number.
4. Write using numbers how many MABs you have, subtract the drawing and written amounts to get your answer.
5. Throw the dice again and see how you go! EASY!

Throws	Draw how many you have	Draw the number you collected this turn	Write the total number of MABs you have	Calculate how many MABs you have
FIRST	<p>I rolled 85 on my first turn!</p> 		85	$\begin{array}{r} 1000 \\ - 85 \\ \hline 915 \end{array}$
SEC	 <p>I rolled a 93 on my 2nd turn!</p>		93	<p>Psst...Subtract the total number of MABs you have from 1000 for the answer.</p>  $\begin{array}{r} 915 \\ - 93 \\ \hline 822 \end{array}$

Throw #	Draw how many you have	Draw the number you collected this turn	Write the total number of MABs you have	Calculate how many MABs you have
FIRST	<p>Start with 1000 (a MAB cube)</p>
